

The Elder Program need to provide information: emergency winter shelter stations within community areas, area community food banks, senior transportation changes, health insurance changes, help in applying for affordable health care, areas that are providing free health care, "VA health care information for Veteran and Spouse" The Elders Information is seriously needed and highly needed. So many changes it is hard to keep up. I figure you already have this information but you ask for input and I thought why not send suggestions. Maybe I am offering just one idea.
